Ex no: 10 Customize Switch with network modules using Cisco Packet tracer.

Aim:

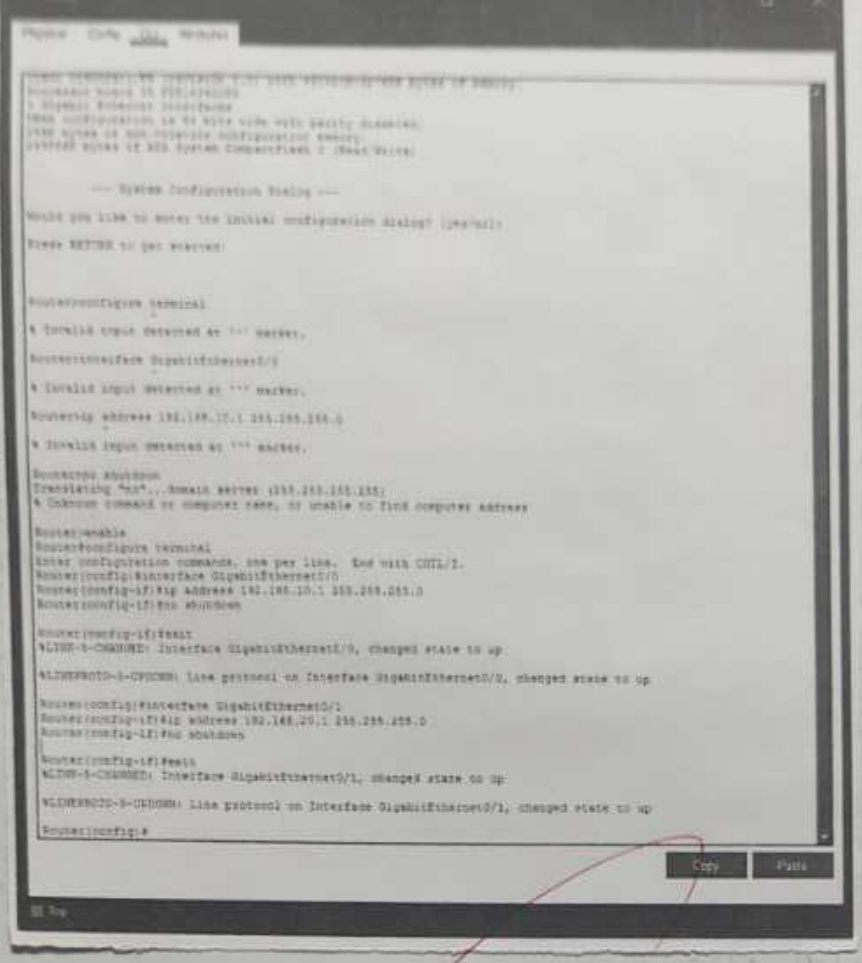

To customize a Cisco Switch by adding or removing network modules using Cisco Packet tracer and verify the changes in the Switch interfaces.

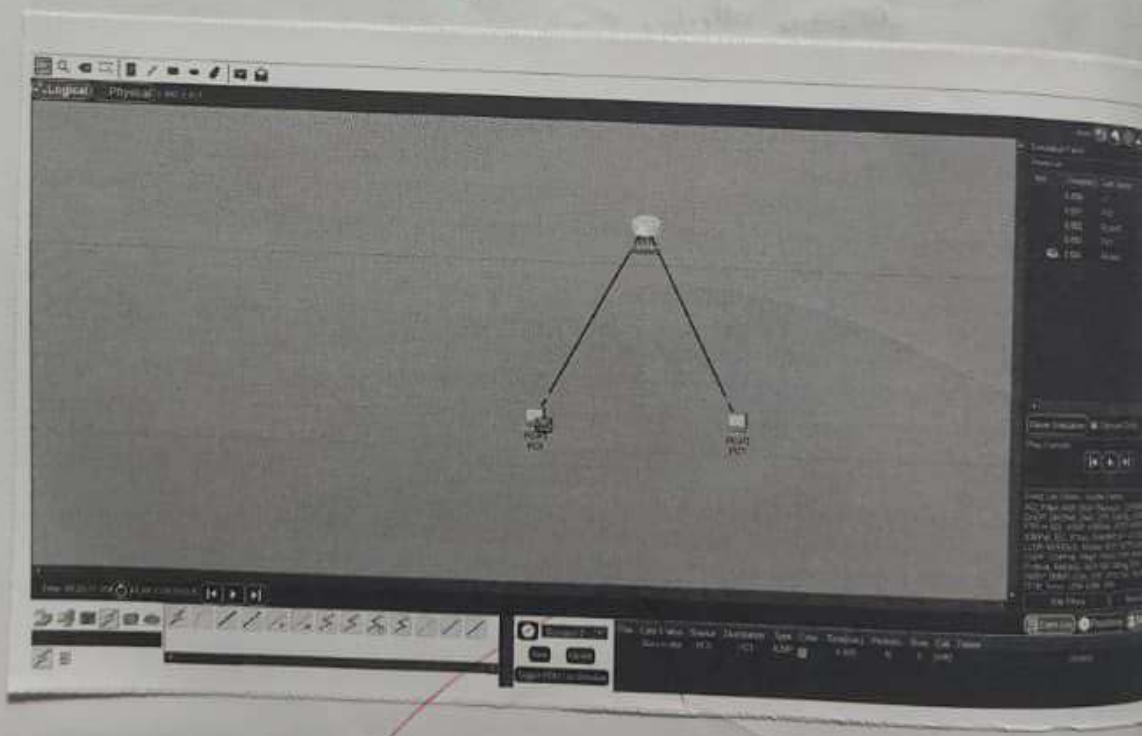

Procedure:

→ Open Cisco Packet tracer
→ Add a module Switch using Cisco 3560
→ Open the physical view
→ Turn off the Switch
→ Remove an existing module
→ Add a netwak module
→ Power on the Switch.
→ verify the new intafaee.
→ Connect end device
→ Configure ip address
→ Test Connectivity.
→ Observe the output.

Result:

Thus, the Customizable Cisco Switch by adding or removing network module is done Successfully.
