Develop a Simple calculator using XML-RPC

Aim:

To develop a Simple calculator using XML-RPC in Python to Perform basic arithmetic operations b/w a client and a Server.

Procedure:

→ Create a folder named XMLRPC_Calculator
→ Create two files : Server.py and client.py
→ Write the XML RPC Server.py.
→ Write the client Program in client.py
→ Open another Command prompt and run Python client.
→ Enter two numbers and Select addition, Subtraction, multiplication or division.

Result:

Thus a Simple calculator was successfully developed using XML-RPC in Python and arithmetic operation where performed b/w the client and Server.
